TURNIP BOY COMMITS TAX EVASION

★★★★☆ | NINTENDO SWITCH, PC

Turnip Boy Commits Tax Evasion is a single-player action-adventure game where you play as an anthropomorphised turnip who seeks to repay his debt to the suspicious Mayor Onion. The player quests to find rare items that further the main story, all while sourcing tools, solving dungeon puzzles, defeating bosses and slowly uncovering the dark and mysterious underbelly of Turnip Boy's world. Side quests are solved by obtaining main quest items, tying the characters and the world together. The bulk of characterisation is given to Turnip Boy and Mayor Onion as they're the characters with whom the player interacts the most. Other characters linger vacuously after interactions with them are complete. The dungeon puzzles and boss fights increase in difficulty as the player progresses, and the quick swapping of tools adds to the challenge. While seemingly innocuous, this game offers an intriguing glimpse into how our world might fare if humans don't take care. Great for lovers of *Stardew Valley*, this game is short, bright and fun throughout. **RAELEE LANCASTER**
